

## Transport and Travel Policy

County Contractors is committed to minimise the environmental impact of its operations. Transport is the fastest growing source of greenhouse gas emissions in the UK, and commuter and business travel constitute nearly 40% of all miles driven by car.

The Company shall work towards continuously improving the environmental impact its activities contribute to climate change.

County Contractors company's **objectives** as related to this policy are the following:

- Reducing the company's vehicle fleet emissions.
- Reduce the environmental impact of transport logistics.
- Using work vehicles efficiently.
- Alternative transport methods.

County Contractors will endeavour to meet or exceed the objectives as set by the implementation of a workplace travel plan.

The plan will include the following 5 points for implementation;

1. Changing the culture of travel within the organisation.
2. Promoting car sharing.
3. Encouraging the use of public transport.
4. Encouraging staff to cycle or walk to work.
5. Encourage the use of green technology in cars, e.g. hybrid or electric.
